

About Protenus

Protenus is a healthcare compliance analytics platform that uses the latest big data techniques and Protenus-led advances in data science, machine learning, visualization, and software engineering to detect and eliminate inappropriate activity in hospital, insurers, and health information exchanges to help healthcare organization build trust with their patients. The Protenus platform uniquely understands the clinical behavior and context of each person accessing patient data to determine the appropriateness of each action, elevating only true threats to privacy and security. Protenus and its partner health systems are fundamentally improving the way hospitals protect their patient data—further ensuring trust in healthcare.
